

CERTIFICATE OF COMPLETION

DrJoFan completed a Cybersecurity Investigation

HopsNStuff

This analyst completed the "HopsNStuff" module, investigating a cyber attack through the analysis of endpoint process events and command-line activities. They demonstrated skills in identifying anomalous file behavior by using Kusto Query Language (KQL) to uncover malicious activities. The investigation highlighted their ability to analyze and deobfuscate malicious PowerShell commands, effectively identifying and responding to data exfiltration techniques.
