

CERTIFICATE OF COMPLETION

DrJoFan completed a Cybersecurity Investigation

MCJ Walker

This analyst completed the "MCJ Walker" module, demonstrating mastery of advanced investigative skills. They used Kusto Query Language (KQL) in an investigation that covered a sophisticated password spray attack, lateral movement via RDP, and full domain compromise.

This exercise showcased their expert-level ability to respond to advanced cyber threats by leveraging in-depth knowledge of threat actor tactics, techniques, and procedures (TTPs).
