

CERTIFICATE OF COMPLETION

DrJoFan completed a Cybersecurity Investigation

Bank of Valdoria Advanced Analyst

This analyst successfully investigated a multi-stage intrusion against a financial institution, tracing the full attack chain from initial access to data exfiltration. They demonstrated the ability to correlate telemetry across multiple log sources, decode obfuscated attacker commands, and identify adversary tradecraft across a complex enterprise environment. Their investigation uncovered persistence mechanisms, credential theft, lateral movement, and data staging activity spanning weeks of adversary operations.
